

Cloud & SaaS application security assurance that systems have been correctly configured, hardened and are being operated securely

The Americas, Europe & Asia-Pacific

Methodology

Our cloud & application security reviews are designed to ensure that correct cloud security best practices are in place, providing assurance to you and your customers that the correct security posture is in place. Our controls matrix, as shared with content owners and the trade bodies, aggregates the key security controls best practices from which we conduct the assessments.

A detailed scoping call is held to understand the specifics of your environment and the tailored assessment is based on your cloud provider best practices and underpinned by the CIS Benchmarks. This is supported by configuration vulnerability scanning to detect misconfigurations and a threat assessment to test for vulnerabilities.

Case Studies

JELLYFISH PICUTRES

Jeremy Smith CTO

"Convergent Risks did a great job in walking us through the entire audit process...When looking to ensure that all compliance requirements are being met (from traditional on-prem or cloud deployments), we found Convergent Risks to be an excellent partner to work with."

ftrack

Magnus Eklöv CTO

"We chose Convergent because they know the creative industry, its security challenges, and offered a new dimension into the security review, going beyond the platform and cloud. We found their comprehensive evaluation as a valuable tool for our business going forward."
