

Cloud & SaaS application security assurance that systems have been correctly configured, hardened and are being operated securely

convergent

The Americas, Europe & Asia-Pacific

### Methodology

Our cloud & application security assessments are designed to ensure that cloud security best practices are being followed, providing assurance to you and your customers that you have the correct security posture in place. Our controls matrix, supported by content owners and the trade bodies, aggregates the CIS Benchmarks for cloud provider security best practices, from which we conduct the assessments.

A detailed scoping call is held to understand the specifics of your cloud environment and the tailored assessment is focused on identifying potential vulnerabilities which you can then remediate. This is supported by configuration vulnerability scanning to detect misconfiguration and a threat assessment penetration test.

### Case Studies

#### JELLYFISH PICUTRES

Jeremy Smith CTO

*"Convergent Risks did a great job in walking us through the entire audit process...When looking to ensure that all compliance requirements are being met (from traditional on-prem or cloud deployments), we found Convergent Risks to be an excellent partner to work with."*

#### ftrack

Magnus Eklöv CTO

*"We chose Convergent because they know the creative industry, its security challenges, and offered a new dimension into the security review, going beyond the platform and cloud. We found their comprehensive evaluation as a valuable tool for our business going forward."*
